

CONTENTS

LIST OF SIGNIFICANT SYMBOLS AND ABBREVIATIONS	5
1. INTRODUCTION	7
2. LITERATURE REVIEW	10
2.1. Laser surface modification of cast irons for wear resistance	10
2.2. Laser surface melting and alloying processes	10
2.3. Laser surface melting of cast irons	16
2.4. Laser surface alloying of cast irons	16
2.5. Laser surface cladding of TiC-reinforced composite layers	19
2.6. Synthesis of TiC-reinforced composite materials in Fe-Ti-C alloy system	20
3. THESIS, AIM, AND SCOPE OF THE WORK	24
4. MATERIALS AND RESEARCH METHODOLOGY	27
4.1. Materials	27
4.2. Research methodology	28
4.2.1. Laser processing	28
4.2.2. Examination of thermal conditions in the molten pool	32
4.2.3. Thermodynamic calculations	36
4.2.4. Metallographic examination	36
4.2.5. Hardness testing	37
4.2.6. Nanoindentation testing	37
4.2.7. Sliding wear testing	37
5. RESULTS AND DISCUSSION	39
5.1. Thermodynamic calculations	39
5.2. Macrostructural characterization	49
5.3. Thermal conditions in the molten pool	62
5.4. Microstructural characterization	70
5.5. Hardness analysis	107
5.6. Sliding wear behaviour	111
6. SUMMARY AND CONCLUSIONS	128
BIBLIOGRAPHY	136
LIST OF FIGURES (in Polish)	150
Abstract	158
