

CONTENTS

- 1. Environmental control system 9**
 - 1.1. ECS general 9
 - 1.2. Air supply 11
 - 1.3. Cooling 16
 - 1.3.1. Heat exchangers 17
 - 1.3.2. Air cycle machine (ACM) or cold air unit (CAU)..... 18
 - 1.3.3. Vapour cycle cooling 22
 - 1.4. Heating 24
 - 1.4.1. Exhaust (manifold) heating systems 25
 - 1.4.2. Combustion heating systems..... 26
 - 1.5. Temperature control 27
 - 1.6. Computers in temperature control 28
 - 1.7. Humidity control 30
 - 1.8. Mass flow control 34
 - 1.9. Distribution systems 36
 - 1.10. Re-circulation air system 40
 - 1.11. Pressurization systems 41
 - 1.11.1. Cabin pressure control systems 47
 - 1.11.2. Electronic pressurization control 50
 - 1.11.3. New developments in ECS 54

- 2. Equipment and furnishing..... 56**
 - 2.1. General 56
 - 2.2. Emergency equipment requirements 58
 - 2.3. Seat, harnesses and belts..... 60
 - 2.4. Cabin layouts 62
 - 2.4.1. Cabin furnishings 64
 - 2.4.2. Cabin entertainment and service systems 65
 - 2.4.3. Galley installations..... 67
 - 2.4.4. Lavatories 70
 - 2.4.5. Cargo handling and retention equipment 70
 - 2.5. Airstairs 78

3. Fuel system.....	80
3.1. General	80
3.2. Airframe fuel system	82
3.3. Aviation fuel	83
3.4. Fuel tank location	85
3.5. Fuel storage	88
3.5.1. Rigid fuel tanks	89
3.5.2. Flexible (bladder) fuel tanks	89
3.5.3. Integral fuel tanks	90
3.5.4. Auxiliary fuel tanks.....	92
3.5.5. Wing fuel storage	94
3.5.6. Fuselage fuel storage.....	95
3.5.7. Horizontal stabilizer fuel storage	95
3.5.8. Airbus A319 / 320 / 321 fuel storage system	95
3.6. Fuel tank ventilation	98
3.7. Fuel feed system	101
3.8. Refueling and defueling system	107
3.8.1. Refueling.....	107
3.8.2. Defueling.....	110
3.9. Active centrum of gravity (CG) control	112
3.10. Crossfeed system	113
4. Hydraulic system	114
4.1. General	114
4.2. Sources of hydraulic power	117
4.3. Hydraulic fluid.....	118
4.4. Hydraulic circuit design	120
4.4.1. Hydraulic reservoir (tank).....	122
4.4.2. Hydraulic accumulators	127
4.4.3. Fluid conditioning	128
4.4.4. Linear cylinders (actuators)	133
4.4.5. Selector valves	137
4.4.6. Check valves	141
4.4.7. Sequence valves	142
4.4.8. Bypass check valves	143
4.4.9. Pressure and thermal relief valves	143
4.4.10. Restrictors	144
4.4.11. Hydraulic pumps	144
4.5. Auxiliary power unit (APU).....	155
4.6. Emergency power	156

5. Fire protection	166
5.1. General	166
5.2. Fire/overheat detection and warning	169
5.3. Fire zones.....	176
5.4. Engine fire prevention	178
5.4.1. Fireproof bulkheads – firewalls	179
5.4.2. Cockpit and cabin interiors	179
5.5. Smoke detection	179
5.6. Fire extinguishing.....	182
5.7. Warnings and indications	186
6. Ice protection	188
6.1. General	188
6.2. Ice detection systems	192
6.3. Ice protection system.....	195
6.3.1. Airfoil-ice protection	198
6.3.2. Engine anti-ice system	198
6.3.3. Wing anti-ice system.....	201
6.3.4. Engine intake leading edges anti-icing	204
6.3.5. Windshields anti-icing protection	204
6.3.6. Propeller de-icing.....	206
6.4. Windscreen wiper	207
6.5. Rain repellent.....	207
6.6. Probe heating system.....	209
6.7. Pneumatic ice protection	210
7. Pneumatic and vacuum system	215
7.1. General	215
7.2. Sources of pneumatic energy.....	218
7.2.1. Air compressors	218
7.2.2. Engine bleed air	218
7.2.3. Auxiliary power unit.....	221
7.2.4. Ground supply.....	222
7.3. Full pneumatic systems	223
7.4. Vacuum systems	226
7.5. Pressure control	227
7.6. Distribution.....	228
7.7. Indications and warnings	230
7.8. System interfaces	231

8. Water and waste systems	234
8.1. General	234
8.2. Pressure control	238
8.3. Water distribution system.....	239
8.4. Water heating.....	239
8.5. Waste water	240
Bibliography	247
